Contractor Verification of Existing Septic System Requirements

Must be on a Certified Contractor Company's **Letterhead** and **signed** by contractor who verified the existing system.

The map will need to show:

1. Location of the existing septic tank and drain field to include measurements from the house to tank and house to drain field
2. Size of the existing tank and linear feet of each drain line – Flag on property
3. Total square footage of drain field
4. Measurements from drain line to closet property line.
- 5. Repair Area / Secondary system:** the full 100 feet per bedroom: i.e., 300 linear feet for a 3-bedroom house, 200 feet for 2-bedroom, etc.

If locating for additions (pools, decking, shed, garage, storage buildings, barns, adding foot print to home, etc.)

Site plan showing location of septic and drain field with measurements to proposed addition

If creating a proposal for bedroom additions, or moving the system show –

Where and how much you are cutting and or adding to the existing system and full repair area (100' per bedroom)
