Pre-Purchase Lot Evaluation

I understand that a pre-purchase lot evaluation for septic system suitability does not guarantee that a septic tank permit will be issued by the Forsyth County Health Department, nor does it guarantee that a permit, if issued, will be approved for a specific number of bedrooms. I also understand that a pre-purchase site evaluation is based on information (plats, soil reports, etc.) provided to our office, the current site conditions of the lot, and current regulations and policies, and that the report issued to me will state if the lot appears suitable for development with a septic tank system, and general recommendations for site development.
