

Repair permit application requirements:

All septic repair permit applications must include the following before we will go out to the site for review:

- Specific linear footage that is being proposed for installation
- Specific type of drain field product that will be used, i.e. Infiltrator Hi Capacity, ARC 36 High Capacity, EZ Flow, conventional gravel, gravel pit, etc.
- How the new drain field will be installed, i.e., bull run valve to new drain field, or added onto the existing drain field

Thank you
