District 2, Public Health

Septic Repair Permit Requirements:

All septic repair permit applications must include the following before we will go out to the site for review:

- Specific linear footage that is being proposed for installation
- Specific type of drain field product that will be used, i.e. Infiltrator Hi Capacity, ARC 36 High Capacity, EZ Flow, conventional gravel, gravel pit, etc.
- Recorded Plat (if applicable)
- How the new drain field will be installed, i.e., bull run valve to new drain field, or added onto the existing drain field.

List the requirements on the application and have it drawn up on a site plan / map.
